
I. Purpose of this document

This document aims to publicize the requirements and necessary documents for requesting participation in the Patent Prosecution Highway (PPH) pilot program between the Korean Intellectual Property Office (KIPO) and the Federal Service for Intellectual Property, Patents and Trademarks (ROSPATENT) at the KIPO in order that an applicant is able to easily file a request for preferential examination under the PPH pilot program.

When an applicant files a request for preferential examination under the PPH pilot program to KIPO based on examination results by the ROSPATENT, the PPH request should meet the requirements described in the below paragraph III.

II. Trial Period for the PPH Pilot Program

The PPH pilot program will commence on November 2, 2009, for a period of one years ending on November 1, 2010. The offices will evaluate the results of the pilot program to determine whether and how the program should be fully implemented after the trial period.

III. Procedures to File a Request for Preferential Examination under the PPH Pilot Program

1. Basic Requirements for Requesting Preferential Examination under the PPH Pilot Program at the KIPO

There are five requirements for requesting preferential examination under the PPH pilot program at KIPO. An applicant must fulfill all five requirements listed below:
1.1 The KIPO application (including a PCT national application) is either:

(1) a national application which validly claims priority under the Paris Convention from either a single national ROSPATENT application or multiple national ROSPATENT applications (examples are provided in Annex I, Figure A, B, C), or

(2) a PCT national phase application where the PCT international application has validly claimed priority from either a single ROSPATENT national application or multiple national ROSPATENT applications (examples are provided in Annex I, Figure D, E), or

(3) a PCT national phase application where the PCT application has no priority claim (example is provided in Annex I, Figure F), or

(4) a national application that validly claims priority under the Paris Convention from either a single PCT application with no priority claim or multiple PCT applications with no priority claims (example is provided in Annex I, Figure G), or

(5) a PCT national phase application where the PCT application validly claims priority from a PCT application which has no priority claims (examples are provided in Annex I, Figure H, I), or

(6) a divisional application of an application as referred to in any of (1) to (5) (examples are provided in Annex I, Figure J).

Refer to Annex I for illustrated examples of the above applications.

1.2 The corresponding application(s) in the ROSPATENT has one or more claim(s) determined to be patentable/allowable by the ROSPATENT

(1) The patentable/allowable claims of the ROSPATENT are the claims which are listed in the “Decision on grant of a patent”.

(2) Corresponding application in the ROSPATENT whose claims are determined to be patentable/allowable does not have to be the application for which priority is claimed in the KIPO application (the basic application). The ROSPATENT application can be an application explicitly derived from the basic application, e.g., a divisional application of the basic application, a converted application of the basic application or an application which claims domestic priority to the basic application (Refer to Example C and J in Annex I).
Where the ROSPATENT application that contains the patentable/allowable claims is not the same application for which priority is claimed in the KIPO application, an applicant must identify the relationship between the ROSPATENT application that contains the patentable/allowable claims and the ROSPATENT priority application claimed in the KIPO application.

1.3 All claims in the KIPO must sufficiently correspond to one or more of those claims determined to be patentable/allowable in the ROSPATENT.

(1) All the claims in the KIPO application for which a request in the PPH program is made must sufficiently correspond or be amended to sufficiently correspond to one or more of patentable/allowable claims in the ROSPATENT application(s).

Claims are considered to “sufficiently correspond” where the claims in the KIPO are the same or substantially same as the claims in the ROSPATENT, or have additions or further limitations of specific features resulting that the claims in the KIPO fall within the scope of the claims in the ROSPATENT.

A claim in the KIPO which a new/different category of claims to those claims indicated as patentable/allowable in the ROSPATENT is NOT considered to sufficiently correspond. For example, the ROSPATENT claims only contain claims to a process of manufacturing a product, then the claims in the KIPO are not considered to sufficiently correspond if the KIPO claims introduce product claims that are dependent on the corresponding process claims.

(2) It is not necessary to include “all” claims determined to be patentable/allowable in the ROSPATENT in an application in the KIPO (the deletion of claims is allowable). For example, in the case where an application in the ROSPATENT contains 5 claims determined to be patentable/allowable, the corresponding application in the KIPO may contain only 3 of these 5 claims.

Refer to Annex II for the cases which are considered to “sufficiently correspond” and the cases which are not considered to “sufficiently correspond".
1.4 Whether examination of the KIPO application has begun or not, it is possible to participate in the PPH program

It is possible to participate in the PPH not only when examination has not begun, but also when examination has already begun.

1.5 A “Request for examination” must have been filed by the applicant in order to request the preferential examination under the PPH.

The request for preferential examination under the PPH must also be accompanied by, or preceded by a request for examination.

2. Document Necessary to File a Request for Preferential Examination under the PPH Pilot Program at the KIPO.

Applicant must submit a “Request Form for Preferential Examination” and “The Explanation of Circumstances Concerning Preferential Examination under the PPH”. The documents 2.1 to 2.4 below must be submitted by attaching them to “The Explanation of Circumstances Concerning Preferential Examination”. Please refer to the ANNEX III for “The Explanation of Circumstances Concerning Preferential Examination under the PPH”.

2.1 A Copy and translation of all claims determined to be patentable/allowable by the ROSPATENT

(1) The copy of the claims determined to be patentable/allowable by the ROSPATENT might be either:

- a copy of the document submitted at initial filing which includes claims determined to be patentable/allowable where no later amendments to the claims have been made, or

- a copy of the amendments which includes claims determined to be patentable/allowable where later amendments to the claims have been made, or

- a copy of the ROSPATENT’s publication of the granted patent.
(2) An applicant is required to submit to the KIPO the professional (manual) translation of the claims determined to be patentable/allowable by the ROSPATENT. Korean or English is acceptable as a translation language.

If it is impossible for the examiner to understand the scope of the translated claims due to inadequate translation, the examiner can request the applicant to resubmit translations. It is noted that a request for the PPH should not be rejected on the basis that the translation is not sufficient to understand the scope of the claims.

(3) It is not needed to submit the copy of the claims in case if the copy of the claims is published at http://www.fips.ru/pph since the copy of the claims is available for the KIPO examiner.

2.2 Copies and translation of all office actions in the ROSPATENT

(1) “Office action” means documents which relate to substantive examination and which were sent to an applicant from the ROSPATENT examiner. The Office actions are limited to “Request”, “Notification on the results of patentability determination” and “Decision on grant of a patent”.

(2) An applicant is required to submit to the KIPO the translations of the Office actions by the ROSPATENT. Korean or English is acceptable as a translation language.

If it is impossible for the examiner to understand the scope of the translated Office actions due to inadequate translation, the examiner can request the applicant to resubmit translations. It is noted that a request for the PPH should not be rejected on the basis that the translation is not sufficient to understand the scope of the claims.

(3) It is not needed to submit the copies of the Office actions in case if the copies of the Office actions are published at http://www.fips.ru/pph since the copies of the Office actions are available for the KIPO examiner.

2.3 Documents cited by the ROSPATENT examiner

(1) The documents to be submitted are those cited in the office action of reasons for
refusal in the ROSPATENT. Documents which are only referred to as references and consequently do not consist of the reasons for refusal do not have to be submitted.

(2) If the cited document is a patent document, applicant does not have to submit it because it is usually available to the KIPO. However, if the cited document is non-patent literature, applicant will have to submit it.

[Note]

In the case where the KIPO has difficulty in obtaining the document, it will ask the applicant to submit it. In every case, translations of the cited documents are not required.

2.4 Claim correspondence table

(1) An applicant must submit a claim correspondence table to explain the correspondence of claims determined to be patentable/allowable in the ROSPATENT and all claims in the KIPO.

(2) An applicant must explain how all claims in the KIPO application sufficiently correspond to the patentable/allowable claims in the ROSPATENT application in the table for each KIPO claims based on the criteria in “III.1.3 All claims in the KIPO must sufficiently correspond to one or more of those claims determined to be patentable/allowable in the ROSPATENT” (Also refer to Annex II for the examples of the claim correspondence).

3. Request fee

An applicant must pay the fee for preferential examination under the PPH same as other request for preferential examination.

4. Notes on Examination Procedures

The KIPO decides whether the application can undergo preferential examination under the PPH when it receives a request along with the documents stated above. When the KIPO
decides that the request is acceptable, the application is assigned a special status for a preferential examination under the PPH.

The KIPO will not notify the applicant of the acceptance for assigning a special status for preferential examination under the PPH, but instead applicant may recognize it by the reception of an office action resulting from preferential examination.

In those instances where the request does not meet all the requirements set forth above, applicant will be notified and the defects in the request will be identified. Applicant may be given opportunity to perfect the request or may be required to submit a new request. If the PPH request is rejected, the applicant will be notified and the application will await examination in its regular turn.
