
The trial period of this Patent Prosecution Highway (PPH) pilot program will commence on 1 January 2013 and will end on 31 December 2014. The trial period may be extended if necessary until the Korean Intellectual Property Office (KIPO) and the Hungarian Intellectual Property Office (HIPO) receive the sufficient number of PPH requests to adequately assess the feasibility of the PPH program.

The Offices may also terminate the PPH pilot program if the volume of participation exceeds manageable level, or for any other reason. Ex Ante notice will be published if the PPH pilot program is terminated.

Applicants can request accelerated examination by a prescribed procedure including submission of relevant documents on an application which is filed with the KIPO and satisfies the following requirements under the KIPO-HIPO PPH pilot program.

When filing a request for the PPH pilot program, an applicant must submit a request form “Request for Accelerated Examination under the Patent Prosecution Highway” to the KIPO.

1. Requirements

(a) The KIPO application (including PCT national phase application) is

   (i) an application which validly claims priority under the Paris Convention to the HIPO application(s) (examples are provided in ANNEX I, Figure A, B, C, F, G and H), or
   (ii) a PCT national phase application without priority claim (examples are provided in ANNEX I, Figure I), or
   (iii) an application which validly claims priority under the Paris Convention to the PCT application(s) without priority claim (examples are provided in ANNEX I, Figure J, K and L).

The KIPO application, which validly claims priority to multiple HIPO or direct PCT applications, or which is the divisional application validly based on the originally filed application that is included in (i) to (iii) above, is also eligible.
(b) At least one corresponding application exists in the HIPO and has one or more claims that are determined to be patentable by the HIPO.

The corresponding application(s) can be the application which forms the basis of the priority claim, an application which derived from the HIPO application which forms the basis of the priority claim (e.g., a divisional application of the HIPO application or an application which claims domestic priority to the HIPO application (see Figure C in ANNEX I)), or an HIPO national phase application of a PCT application (see Figures H, I, J, K and L in ANNEX I).

Claims are “determined to be patentable” when the HIPO explicitly identified the claims to be patentable in the latest office action, even if the application is not granted for patent yet. The office action includes:

1. Notification Specifying the Intention to Grant a Patent (the heading of the communication is “Felhívás nyilatkozattételre és megadási díj megfizetésére”)  
2. Decision to Grant a Patent

Claims are also “determined to be patentable” in the following circumstances: If the HIPO office action does not explicitly state that a particular claim is patentable/allowable, the applicant must include an explanation accompanying the request for participation in the PPH pilot program that no rejection has been made in the HIPO office action regarding that claim, and therefore, the claim is deemed to be patentable by the HIPO.

(c) All claims in the KIPO application (for which an accelerated examination under the PPH pilot program is requested), as originally filed or as amended, must sufficiently correspond to one or more of those claims determined to be patentable in the HIPO.

Claims are considered to “sufficiently correspond” where, accounting for differences due to translations and claim format, the claims in the KIPO are of the same or similar scope as the claims in the HIPO, or the claims in the KIPO are narrower in scope than the claims in the HIPO.

In this regard, a claim that is narrower in scope occurs when an HIPO claim is amended to be further limited by an additional technical feature that is supported in the specification (description and/or claims).

A claim in the KIPO which introduces a new/different category of claims to those claims determined to be patentable/allowable in the HIPO is not considered to sufficiently correspond. For example, the HIPO claims only contain claims to a process of manufacturing a product, then the claims in the KIPO are not considered to sufficiently correspond if the KIPO claims introduce product claims that are dependent on the corresponding process claims.

It is not necessary to include “all” claims determined to be patentable/allowable in the HIPO in an application in the KIPO (the deletion of claims is allowable). For example, in
the case where an application in the HIPO contains 5 claims determined to be patentable/allowable, the application in the KIPO may contain only 3 of these 5 claims. Refer to ANNEX II for the cases which are considered to “sufficiently correspond” and the cases which are not considered to “sufficiently correspond”. Any claims amended or added after the grant of the request for participation in the PPH pilot program need to sufficiently correspond to the claims indicated as patentable/allowable in the HIPO application.

(d) A “Request for Examination” must have been filed. The request for accelerated examination under the PPH must be accompanied by, or preceded by a request for examination. The request for accelerated examination under the PPH may be filed not only when examination has not begun, but also when examination has already begun.

2. Documents to be submitted

Documents (a) to (d) below must be submitted by attaching to “Request for Accelerated Examination under the Patent Prosecution Highway”. Note that even when it is not needed to submit documents below, the name of the documents must be listed in “Request for Accelerated Examination under the Patent Prosecution Highway” (Please refer to the example form below for the detail).

(a) Copies of all office actions (which are relevant to substantial examination for patentability in the HIPO), which were sent for the corresponding application by the HIPO and translations thereof

Either Korean or English is acceptable as translation language. Machine translations will be admissible. But if it is impossible for the examiner to understand the translated office actions, the examiner may request the applicant to resubmit translations. It is not required to submit the office actions and translations thereof when those documents are available via Dossier Access System (DAS) of HIPO.

(b) Copies of all claims determined to be patentable/allowable by the HIPO and translations thereof

Either Korean or English is acceptable as translation language. Machine translations will be admissible. But if it is impossible for the examiner to understand the translated claims, the examiner may request the applicant to resubmit translations.
It is not required to submit the claims and translations thereof when those documents are available via Dossier Access System (DAS) of HIPO.

(c) **Copies of references cited by the HIPO examiner**

Reference documents which are not relevant to the reasons for refusal stated in the office action are not required to be submitted.

If the references are patent documents, the applicant is not required to submit them. When the KIPO does not possess the patent documents, the applicant has to submit the patent documents at the examiner’s request. Non-patent documents must always be submitted. The translations of the references are unnecessary.

(d) **Claim correspondence table**

The applicant requesting for PPH must submit a claim correspondence table, which indicates how all claims of the KIPO application sufficiently correspond to the patentable claims of the HIPO application.

When claims are just literal translations, the applicant can just write down that “they are the same” in the table. When claims are not just literal translation, it is required to explain the sufficient correspondence of each claim based on the criteria 1.(c) (Please refer to the example form below and ANNEX II).

3. Example of “Request for Accelerated Examination under the Patent Prosecution Highway” for filing request of an accelerated examination under the PPH pilot program

(a) **Circumstances**

When an applicant files a request for participation in the PPH pilot program to the KIPO, the applicant must submit a request form “Request for Accelerated Examination under the Patent Prosecution Highway”.

The applicant must indicate that the application is included in (i) to (iii) of 1.(a), and that the accelerated examination is requested under the PPH pilot program. The application number of the corresponding HIPO application(s) also must be written.

In the case that the application which has one or more claims that are determined to be patentable is different from the HIPO application(s) included in (i) to (iii) of 1.(a) (for example, the divisional application of the basic application), the application number of the application(s) which has claims determined to be patentable/ and the relationship between those applications also must be explained.
(b) **Documents to be submitted**

The applicant must list all required documents mentioned above 2. in an identifiable way, even when the applicant is exempted to submit certain documents.

(c) **Notice**

An applicant can file the “Request for Accelerated Examination under the Patent Prosecution Highway” to the KIPO through either paper-based or on-line procedures.

4. **Procedure for the accelerated examination under the PPH**

The KIPO decides whether the application can be entitled to the status for an accelerated examination under the PPH when it receives a request with the documents stated above. When the KIPO decides that the request is acceptable, the application is assigned a special status for an accelerated examination under the PPH.

In those instances where the request does not meet all the requirements set forth above, the applicant will be notified and the defects in the request will be identified. The applicant will be given opportunity to perfect the request. If not perfected, the applicant will be notified and the application will await action in its regular turn. Then the applicant may resubmit the request.

The KIPO will not notify the applicant of the acceptance for assigning a special status for accelerated examination under the PPH, but instead applicant may recognize it by the reception of an office action resulting from accelerated examination.
Example form of “Request for Accelerated Examination under the Patent Prosecution Highway”
(consists of 2 Forms: Request for Accelerated Examination and Explanation of Request for
Accelerated Examination under the Patent Prosecution Highway)

【서류명】심사청구(우선심사신청)서 (Form of Request for Accelerated Examination)

ANNEX III

Examples for the claim correspondence

1. The claims in the following cases (case 1 to case 4) are considered to “sufficiently correspond” to each other.

<table>
<thead>
<tr>
<th>Case</th>
<th>“Patentable” claim(s)</th>
<th>PPH claim(s)</th>
<th>Correspondence</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Claim</td>
<td>Wording</td>
<td>Claim</td>
</tr>
<tr>
<td>Case 1</td>
<td>1 A</td>
<td>1 A</td>
<td>PPH claim 1 is the same as “Patentable” claim 1.</td>
</tr>
<tr>
<td>Case 2</td>
<td>1 A</td>
<td>1 A</td>
<td>PPH claim 1 is the same as “Patentable” claim 1.</td>
</tr>
<tr>
<td></td>
<td>2 A+a</td>
<td>2 A+a</td>
<td>PPH claim 2 is created by adding a technical feature disclosed in the specification to “Patentable” claim 1.</td>
</tr>
<tr>
<td>Case 3</td>
<td>1 A</td>
<td>1 A</td>
<td>PPH claim 1 is the same as “Patentable” claim 1.</td>
</tr>
<tr>
<td></td>
<td>2 A+a</td>
<td>2 A+a</td>
<td>PPH claims 2, 3 are the same as “Patentable” claims 3, 2, respectively.</td>
</tr>
<tr>
<td></td>
<td>3 A+b</td>
<td>3 A+b</td>
<td></td>
</tr>
<tr>
<td>Case 4</td>
<td>1 A</td>
<td>1 A+a</td>
<td>PPH claim 1 has an additional technical feature ‘a’ disclosed in the specification.</td>
</tr>
</tbody>
</table>

2. The claims in the following cases (case 5 and case 6) are NOT considered to “sufficiently correspond” to each other.

<table>
<thead>
<tr>
<th>Case</th>
<th>“Patentable” claim(s)</th>
<th>PPH claim(s)</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
